Subject: Talking Points

Hi Beth, No More Deaths has requested a meeting with me on Friday, August 28th to discuss their operations as related to the refuge. They intend to bring their "legal folks" with them. Juliette told me that you have developed talking points that Bill Radke (they evidently intend to meet with Bill also) and I could use in our meetings with them. Could you send me these? I have told these organizations that I favor the deployment of more rescue beacons which Border Patrol puts out (at our urging sometimes) for the purpose of saving lives over them putting out water. I also believe that if they are going to put out water it should be similar to what Humane Borders does, and that is to install stationary 55 gallon water barrels in locations mutually agreed to. And would not include putting out food and clothing.

Background:

No More Deaths, the Ajo Samaritans, and others' operations has included putting out water, food, and sometimes clothing for illegal border crossers (IBC) for the purpose of saving lives. They do the same on the adjacent Barry M Goldwater Range, Organ Pipe Cactus National Monument, and BLM lands. All of these agencies oppose this activity as it leaves significant trash and encourages IBCs to further their journey which still puts them at risk, especially when they enter BMGR's bombing range. The agencies mentioned above have discussed through the Barry M Goldwater Executive Committee the possibility of our joint meeting with the U.S. Attorney's Office in Tucson to discuss this issue but haven't made any decisions yet - and I'm waiting for guidance from the RO on this issue. It is important to note that the overwhelming majority of the IBC's crossing the refuge and adjacent federal lands are narcotic smugglers and not poor families looking for work or a better life.

I look forward to receiving and discussing your "talking points" in my preparation for the meeting.

Thank you

Sid

Sid,

Does Cabeza currently have any water stations on the Refuge? What about Rescue beacons? How many of those?

We have one Humane Borders water station on the Camino, six blue flag waters, and about six rescue beacons. We certainly could use more rescue beacons and I've asked Border Patrol for more. They've asked me if we could put some rescue beacons out and I told them no, that I didn't have the resources. Their big issue with more beacons is the manpower required to inspect them on a daily or weekly basis.
